

The Fleet Optimization Experts

BonVoyage System/Ship Routing Services

BonVoyage System and Ship Routing Services Combined

One Package Maximizing Voyage Safety and Efficiency

The combination of BonVoyage System (BVS) and AWT's ship routing services provides you the best value for your money. In recent years, the Captain's duties have become more and more complex with new regulations, security concerns and mountains of paper work. This gives them less opportunity to allocate enough time to thoroughly evaluate all routing options and come up with the optimum route. And with the high price of fuel today, every extra hour at sea can be very costly. AWT's team of Fleet Optimization Experts spend 24x7 evaluating all the complex variables that go into selecting a route, and they can give the Captain expert advice to ensure a safe and efficient voyage along with the tools to manage your fleet effectively.

Benefits from Combined BVS and Ship Routing Services:

- Timely expert route recommendations from AWT's team of voyage optimization experts help ensure maximum return on investment
- Graphical depiction of weather, routes and currents through BVS
- Access to PORTAL, AWT's fleet management tool
- Severe Motion Alerts
- Detailed NCOM current data
- 16-day forecast available twice per day
- BVS voyage input and optimization tools
- BVS data delivery via email with file size reduced by over 50%
- Access to AWT's 24-hour Masters Hotline
- Daily Fleet Status reports
- End-of-voyage performance analysis

“Hapag-Lloyd now has BonVoyage installed onboard more than 45 vessels trading worldwide. We continue to provide valuable feedback from our Masters, enabling AWT to further fine tune the full range of ship-routing services provided to the maritime industry world-wide.”

*– Richard von Berlepsch,
Senior Director Ship Management,
Hapag-Lloyd AG*

Plus the Power of PORTAL

By combining BVS and Ship Routing services, you also will have full access to AWT's powerful fleet management tool, PORTAL. With PORTAL, you can quickly monitor your fleet and ensure they are operating efficiently and safely. PORTAL is a password protected web-based application that is easy to use and provides all the information you need to quickly assess your vessels' status. PORTAL can be accessed 24x7 from any computer with an Internet connection via <http://www.weatherrouting.com>

PORTAL Benefits:

- Easier monitoring of your fleet's progress
- Great tool to monitor vessels ETA, fuel consumption and speed performance
- Convenient access via any computer with internet connection
- Secure data
- 24x7 access
- No software or data to download
- Real-time data from the AWT production database (no delays)
- Customized alerts allow immediate focus on vessels with potential problems
- Comprehensive voyage details
- Preliminary performance evaluations
- Historical performance reports

“I especially like your Web display and capabilities. It made it easy for us to manage our vessels on their voyages.”

– Augusto Pozo,
Operations Superintendent,
Ciudad del Carmen,
Campeche, Mexico
